96 Hour STAC Report

- Next Report: 05/29/18

SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) are scaling up their response to this incident, as more cases have been detected.
- CDFA has confirmed that there are no commercial premises currently involved.
- CDFA has confirmed there is no public health risk due to this virus.
- Cal OES Southern Region continues to assist CDFA in identifying a facility to expand operations, as the current Incident Command Post (ICP) is too small for the current number of responders and supplies.
 - The three day weekend delayed obtaining a facility.
 - CDFA prefers to have the facility in the immediate area of the CDFA district office, located in the City of Ontario, San Bernardino County.
 - The Cal OES Southern Region Agency Representative (AREP) obtained a list of facilities from San Bernardino County Real Estate Services. CDFA has expressed interest in some of the facilities on the list. Appointments will be made on Tuesday 05/29/18, to inspect the facilities.
 - An inquiry will also be made on Tuesday 05/29/18, with the California Department of General Services (DGS) to locate available facilities in the area.

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will monitor the incident through the holiday weekend.

Deployment

- One (1) Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an operational period of 0700-1900 hours.
- One (1) Cal OES Logistics Section Chief deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

WEATHER SYNOPSIS BY REGION

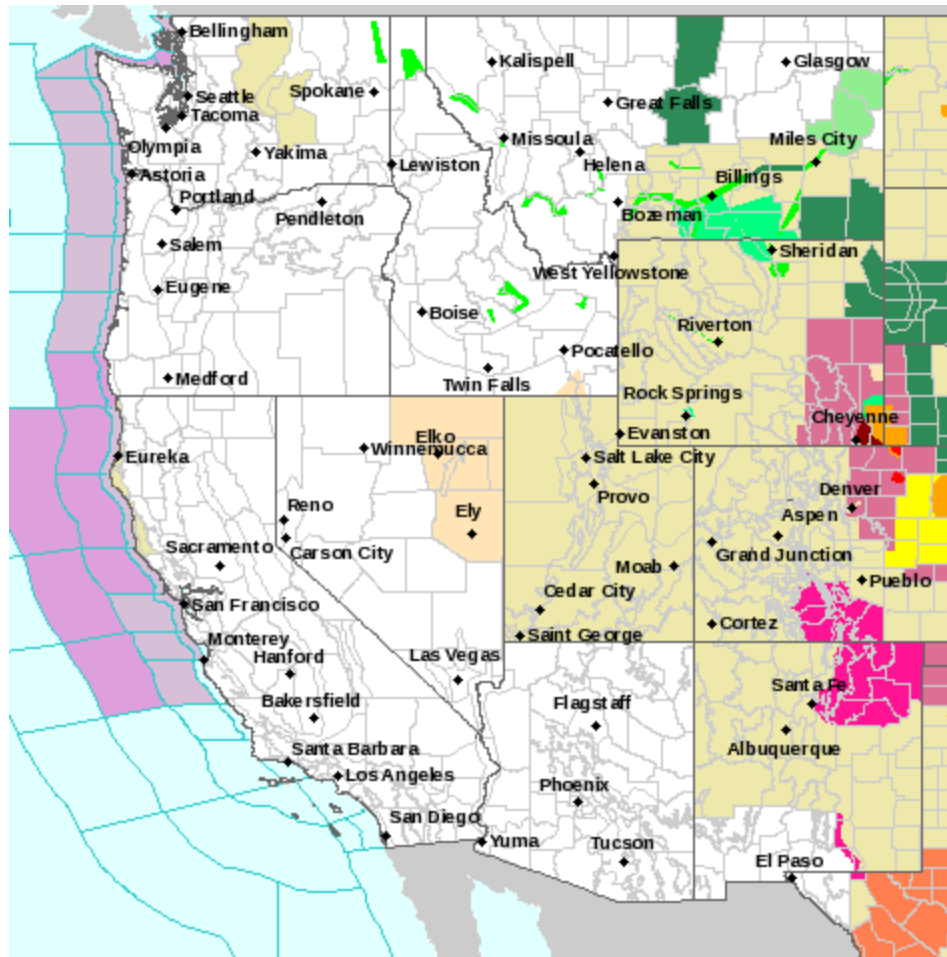

NORTHERN CALIFORNIA

A high pressure ridge will be over the region today and produce the warmest weather so far this year. Areas southeast of Lake Tahoe may see a few showers or isolated thunderstorms, but the majority of the region has been sunny today. Temperatures are 10-15 degrees above normal. On Tuesday conditions will begin to moderate as the next low pressure trough approaches the region. The trough will produce near normal temperatures and higher humidity through next weekend. Winds will increase each afternoon, with peak gusts near 30 mph along the coast, through the delta and eastern Bay Area, and east of the crest for several days. It will also bring a return of a daily chance of afternoon showers and thunderstorms in the mountains into next weekend.

SOUTHERN CALIFORNIA

A weak ridge of high pressure over California will bring near to a little above normal temperatures through Tuesday, with 70s to low 80s across the mountains and mid 80s to mid 90s in the valleys. Minimum humidity will be mainly 20-40% away from the deserts through Tuesday. Isolated afternoon showers and thunderstorms will form over the Sierra Crest through Tuesday. Winds will be light through Tuesday. A Pacific trough will bring much cooler temperatures and an increase in humidity to the region Wednesday and Thursday. This trough will also cause westerly winds of 20-30 mph with gusts to 50 mph to surface across the desert passes Wednesday and Thursday. The marine layer will become deep, with morning low clouds and fog making it over the lower coastal mountain slopes Thursday and Friday. The trough will weaken bringing a warming and drying trend Friday through this weekend. Temperatures will warm to around normal this weekend.
